

Form 1515 Schedule A

By Andy Crane

Complete the following three schedules. Be sure to perform all the steps and show all intermediate steps. Failure to do so will result in strict penalties. Upon completing the work, affix Schedule B to Schedule A and use as a cover for Schedule C.

The village of Knightsville is full of people who like to attack as knights tend to do. During the annual census, each resident reports exactly how many of his neighbors could attack him to the census taker. Below are the results from the last two years. There is suspicion that Dr. Solvem has been conspiring with these knights, but first it is necessary to determine where they lived last year and live now so that the authorities can question them.

Form 1515 Schedule C

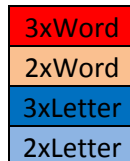

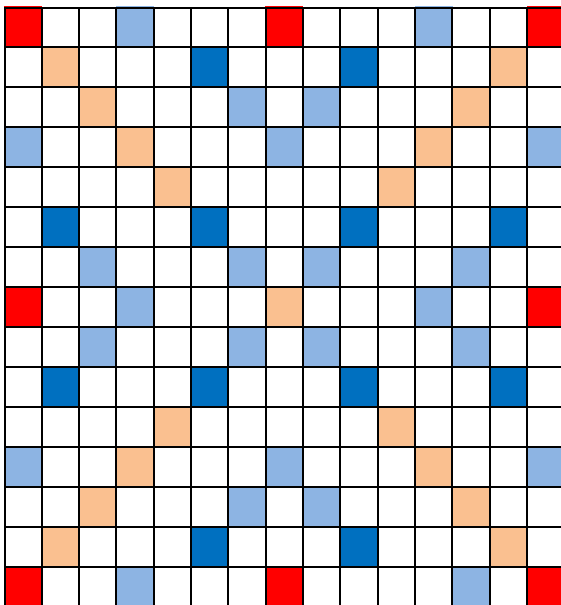

By Andy Crane

It's no secret that Professor Solvem was a Scrabble guru. He didn't always play by standard rules. To keep his skills up, he'd lump a bunch of pieces together and then try to fit them on the board and earn as many points as possible. The point values, definitions, and word lengths for each of his words are listed here.

He ignored proper nouns rules and for scoring, he never counted a bonus for words of 7 or more letters. Otherwise he followed the normal rules of word and letter multipliers shown on the board, and the following point values:

- 1 pt: A, E, I, L, N, O, R, S, T, U
- 2 pts: D, G
- 3 pts: B, C, M, P
- 4 pts: F, H, V, W, Y
- 5 pts: K
- 8 pts: J, X
- 10 pts: Q, Z

He boasted of an incredibly high-scoring word he found, but we all know he didn't quite follow the rules.
