

SKY HIGH

By: Han-Wen Yeh

Getting a little bored? Here's an activity designed to stretch your physical and mental muscles.

1. Cut out the square with the dashed edges.
2. Fold the square along the lines in a way such that the panels are arranged in this order:
7 2 3 6 5 4 1 8 9 16 13 12 11 14 15 10. Panels 8 and 9 should face each other.
3. It looks like your contraption has grown a pair of wings. Open its wings and let it fly high into the sky.
4. Run with your contraption. See how long you can keep it up by blowing on it from below.

(Note: Please exercise caution when following the above steps. CPC Air is not responsible for any physical damage incurred as a result of this fun activity)
