# SOLUTION: History

**THIS IS PART 1 OF A SECRET 2-PART PUZZLE. Read the answer for "History" first then read the answer for "Rewritten".**

In part 1, players are given an unusual, circular grid with the word **WRONG** as a given answer. It's trickier than it looks because many clues can be answered in multiple ways. Players must transfer known letters via the connections to help narrow down the possible answers for each clue to a single choice. Once complete, reading the indicated letters in order reveals the final answer. (*You can't choose just any answers that fit; Fate determines the outcome. So Fate trumps free will – or does it? The story continues in part 2, "Rewritten".*)
