

Dubloony

Captain Jim Finch was shipwrecked! He managed to make it to a rowboat in time, but his treasure's been set adrift in the rapids around the rocks. If he hits a patch of rapids, he'll be thrown in the direction of those rapids until he runs aground on a coral reef.

Jim's rowboat is sturdy, but if he hits more than 6 patches of coral it will surely start taking on water. Jim's a strong swimmer, but if his rowboat sinks in the rapids he certainly won't make it out alive. He's got to collect as much gold as possible without scuttling his dinghy.
