

SOLUTION: Twelve Seahorses

Author: Nathan Baird

Looking at the puzzle, you'll start to notice that there are some partial words hidden in the word search. Each seahorse represents either 'sea' or 'horse' in the words that are found.

Sea – Seabed, Seadog, Seagull, Seaport, Seawater, Seaway

Horse – Horsedrawn, Horsepower, Horsetail, Packhorse, Racehorse, Warhorse

The leftover letters give the following clue phrase: C HORSE VALID MOVES

Noting that the grid is colored like a chess board and is 8x8, there is a single knight in the C file on the chess board. Looking at all valid moves from that location gives the answer when reading the letters clockwise.
