by Philip Z Loh and Karthika Muthuramu

We come to dogshaming for this puzzle. Each picture comprised a dog (Labracadabra) and a sheet of paper that explained what the dog did wrong and what her yoga position punishment was.

Each spelled out yoga position – shown in alphabetical order – is a single letter insertion away from a real yoga position. Additionally, the ingredients or items that Labracadabra always seems to mess up begin with a unique letter of the alphabet from A-U. We use that to order our information.

What is LENGTH CURRENT TIME TIME? Well, if we look back at this puzzle closer, we should notice that Labracadabra trespassed into the POTIONS lab and is now put into yoga POSITIONS. The inserted letters are "SI" – for SI Unit. The SI base units for length, current, time, time, are m, A, s, s – which reads MASS. Doing this once more yields the true answer, **KILOGRAM**.

ANSWER:
KILOGRAM

By the way, this is Labracadabra (real name Kutti) attempting something more like a yoga pose maybe? She is a good dog. No dogs were harmed in the making of this puzzle.
