

# Solution to To All the Girls I've Loved

By Justin Marks

The puzzle is a list of TV shows. From reading the flavor text, there are a bunch of references to NBC's *Seinfeld*, specifically to the fact that Jerry dated a lot of people. By looking online ([http://en.wikipedia.org/wiki/List\\_of\\_Seinfeld\\_girlfriends](http://en.wikipedia.org/wiki/List_of_Seinfeld_girlfriends)), you can find a list of Jerry's girlfriends in the show, their character name, and the name of the actresses who played them. Looking over this list, many of them have been in other TV shows (e.g. Courtney Cox starred in Friends). Using this information, one of the regular actresses in each show listed also appeared as Jerry's girlfriend in an episode of *Seinfeld* (<http://www.tv.com> and [Wikipedia](#) are your friends). By reading down the first letter of each character name, you get the answer— **GLASSES** which also happens to be another *Seinfeld* episode.

## TV Show

The Crew  
Studio 60 on the Sunset Strip  
Soldier of Fortune, Inc.
