

# Equation Expedition

By Cierra McDonald

$2\ 4\ 9\ \square$

$2\ 1\ 2\ \square$

$8\ 4\ 5\ \square$

$5\ 6\ 8\ \square$

$9\ 8\ 2\ \square$

$5\ 7\ 4\ \square$

$x + y! - z^2$

$$\frac{x + y^2}{z} \quad \begin{pmatrix} xz \\ y \end{pmatrix}$$

$$\frac{x + y}{z}$$

$$\frac{\sqrt{y^2 + z^2}}{x}$$

$$\sqrt{3x + y - 5z}$$

On the northern shore of the island, there's an odd ruin in the shape of Stonehenge. On first inspection, it doesn't seem to be a dial. Maybe it was some sort of communication device to contact aliens: E.T. Phone Home, you know.
