

The Abandoned Cave Solution

By Jason Geffner

The hieroglyphics spell out YAKKO SAN using the Wingdings font.

If you do a web search for YAKKO SAN (<http://search.live.com/results.aspx?q=%22YAKKO+SAN%22>), you'll find that a Yakko San is an origami design, and you'll also be able to find folding instructions to create a Yakko San (folding instructions at first link on <http://search.live.com/results.aspx?q=%22YAKKO+SAN%22> as of 9/30/06).

You then need to cut out the "parchment paper" and fold it into a Yakko San. You may need to look at the back of the final Yakko San to see this solution. The correct lines will end up connecting to spell out **CAPE TOWN**.
