

We must find out where the apocalypse will begin, it's the only way to stop it. We'll have to figure out each of the 4 spin locks below independently. The rings will have to be turned independently of each other so that we spell out 4 related things on all the cardinal directions, with each word reading down or to the right, in other words they don't all read in toward the center.

Page 2 should be filled in with what the spin locks look like after being solved.
