

Solution to Major League

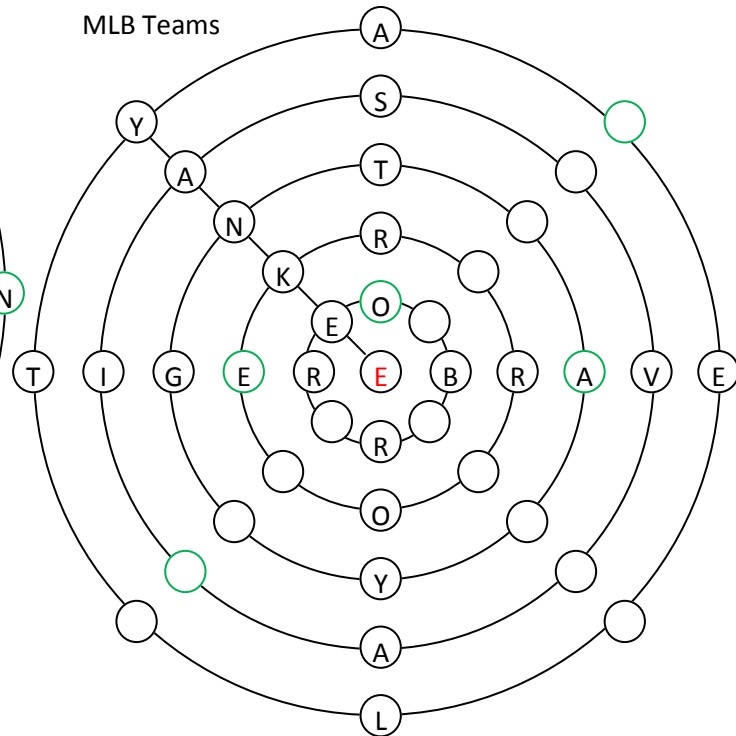

By Amos Eshel

- The solutions to the spin locks can be found below, with unnecessary letters not placed and a green border on the circles originally located north. As you can see each spin lock's 4 related things are sports team from one of the four major sport leagues in the US (without it's trailing S). This is further clued on the first three letters of each southeast spoke *before* trying to turn any of them (NHL, MLB, NBA, NFL).
- With each spin lock filled out correctly the northwest spoke (reading down and to the right) nearly gives a fifth team from each sport, except that the sixth letter of each is missing. These letters put together spell **RENO**.

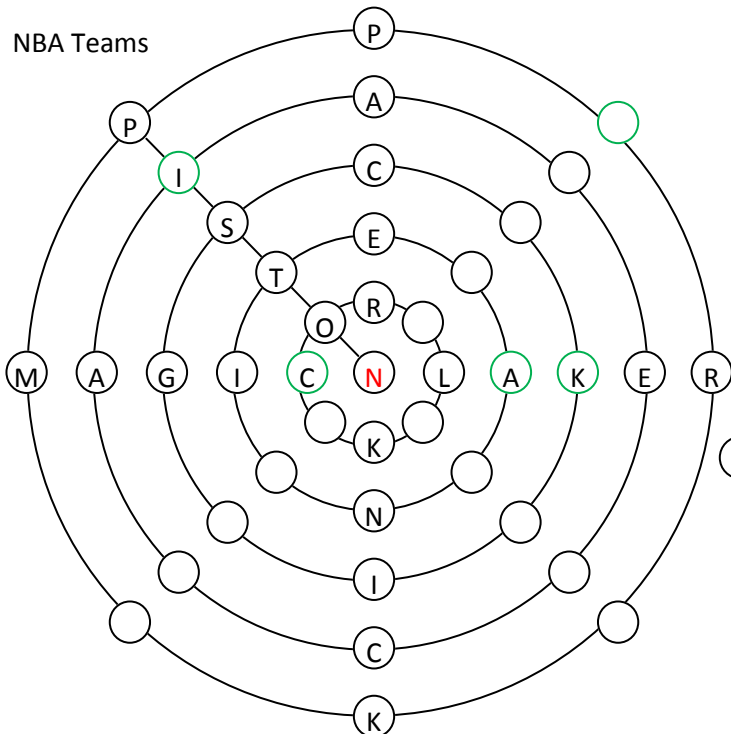

NHL Teams

MLB Teams

NBA Teams

NFL Teams
