Palau

In term of age or population, few people would rank Palau much ahead. Palau is one of the world's youngest and least populace nations. A small nation made up of islands in East Asia, Palau is in a class of its own when it comes to natural features. Palau, which is located at the edge of the Philippine sea is home to all sorts of tropical sea life, with a barrier reef and tropical waters.

"Elementary, My Dear Watson"

This is a modified nonogram or "griddler" puzzle.
