

# Solution to One Fish Two Fish Red Fish Blue Fish

By Drew Besse

Name the types of fish that appear in the puzzle by identifying the pictures. While not all pictures can be uniquely identified, some can and will give you enough room to start.

Each picture starts with a different letter of the alphabet, and there are twenty six total pictures so you can use these letters to construct a 12 by 12 word search. The wordlist is the names of the various pictures (So, for example, at the top left there is a METHANE molecule, an EGGPLANT, a TURTLE, a HAZMAT suit, an AWARD, a NUTCRACKER and another EGGPLANT so that is where METHANE is hidden). This can help pin down the proper names for the more ambiguous pictures.

Once you have found all the words, there are 19 unused letters which when read off say "LONGEST WORD IN PUZZLE" which is **NUTCRACKER**
