

Solution to Spork

By Drew Besse

This is a "crack the code" puzzle. The first step is to use semaphore, using the direction the utensils face, forming pairs going left to right then top down. This spells out USEMORSEKNIFEISDOTSPOONISDASHFORKISAREST or "Use Morse, Knife is dot, Spoon is dash, Fork is a rest"

Again going left right then top down, that gives you the Morse code string .- ... -.-. -.-.-.-.-. -. --- .-.-. ---.-. -.-.-. - --. Which when converted to characters is ASCIIREADDOWNONESAREBIG or "Ascii. Read Down. Ones are big"

So now convert the grid to binary ASCII, with big knives/forks/spoons being 1 and small ones being 0. Read top down then left right as instructed

This gives you 01010011 01100101 01100011 01110010 01100101 01110100 01000011 01101111 01100100 01100101 or SecretCode so the answer is **SECRETCODE / SECRET CODE**
