

Solution to We're Under Attack

By Amos Eshel

- If we number the first set of pictograms from the top-left corner and work our way right, then down. The pictograms represent in numbered order are the following words/phrases:
 - 1) Jack-in-a-box
 - 2) Green with envy
 - 3) A cut above the rest
 - 4) Broken promise
 - 5) Small talk
 - 6) Get up and go
 - 7) Water [H to O]
 - 8) Go up in smoke
 - 9) Matinee
 - 10) Reduction
 - 11) Safety in numbers
 - 12) Mixed metaphor
 - 13) Shop 'til you drop
 - 14) To funny for words
 - 15) Tickled pink
 - 16) Top hat
 - 17) Split personality
 - 18) Sit down and shut up
 - 19) Robin Hood
 - 20) Once in a blue moon
 - 21) Beaten black and blue
 - 22) Back to square one
 - 23) Half hearted
 - 24) Overall
- These all fit into the given blanks by these same numbers, and also the order of the blanks is alphabetical.
- The numbers in the blanks also provide an extraction of a letter which allows one to move to the next set of pictograms. This next set (if we start numbering at 25 where we left off) has the same properties of the first with regard to numbering and alphabetical-ness. This set represents:
 - 25) Over and over again
 - 26) Scrambled eggs
 - 27) Three blind mice
 - 28) Excellency
 - 29) Bolt upright
 - 30) Painless operation
- Repeating the extraction method above with these new words/phrases gives one last pictogram to solve, this one is: **SPACE INVADERS** and is the final answer.
