418 File Not Found

Attempting to viewing this puzzle on the website returned an error page. Error code 418 is the HTTP status code "I'm a teapot (RFC 2324)" not the File Not Found which is 404. The 418 status code was defined as an IETF April Fools joke, a hint that this is in fact a puzzle not a web page error.

The only other data in the puzzle is the URL which contains a suspicious looking URL very different then other puzzle URLs.

When you take the GUID 5375626d-6974-4153-7465-616b43757421 and convert the hex bytes into ASCII you get

"SubmitASteakCut!"
