

# Solution to Calculator Help

By amosesh

Most people probably wouldn't need a calculator for all of these, but the instructions suggest it anyway because when taking the answer to each and turning the calculator upside down words get spelled out (a.k.a BEGHILOS)

- $345 = 5 * (6 * 10 + 9)$
  - $51 = 2 * 5 ^ 2 + 3 ^ 2 - 2 ^ 3$
  - $5 = 5 ^ 3 - 5!$
  - $0 = 4 ^ 2 - 2 ^ 4$
  - $5 = 10 * 2 - 3 * 5$
  - $34 = 16 + 2 + 16$
  - $51 = 7 ^ 2 + 2$
  - $7718 = 7 * 11 * 10 ^ 2 + 6 * 3$
- Reading those answers gives us:  
she is s o s he is bill
  - With some better punctuation:  
She is S.O.S., he is Bill
  - A search on S.O.S. should show that it can stand for Secretary of State, which fits the politics (italicized in the flavor text). The current Secretary of State is Hillary Clinton, wife of Bill Clinton (former President, more politics). Therefore the big shots coming to the set are the **CLINTONS**.
