

Solution to New TV Series

By Katie Flinn

To solve this puzzle you need to solve the 10 Slytherlink puzzles. The rules to Slytherlink puzzles are:

- Each number clue indicates how many of that square's edges have lines.
- Blank squares indicate that you have no information about that square. It might have anywhere between 0 and 3 lines.
- The lines must form a single closed loop.

Solving all of the puzzles give you the letters EVIL WIZARD. Based on the puzzle type (slytherlink), and the hints about movie series and snakes, the correct evil wizard is Voldemort.

VOLDEMORT
