

# Solution to Needs a Title

By Amos Eshel

All of the excerpts are from the webcomic [xkcd.com](http://xkcd.com). They each come from a different comic and those comics are as follows:

- #18: Snapple
- #79: Iambic Pentameter
- #140: Delicious
- #201: Christmas GPS
- #262: IN UR REALITY
- #384: The Drake Equation
- #445: I Am Not Good With Boomerangs
- #506: Theft of the Magi
- #567: Urgent Mission

The comic numbers are in an arithmetic progression with difference 61. The comic that should be represented at #323 is missing, its title is **BALLMER PEAK** and according to the title of the puzzle, we need a title.
