

Solution to Break in Plan

By Brandon Bray and Tammy Culter

This was the t-shirt puzzle. The bank layout and plan is just the setting. To solve the puzzle, focus on the thieves. Each of them has a flashlight and a four digit binary number. Each flashlight faces in a direction such that if one were to "connect the dots" the result is a digital alarm clock letter.

Connect the lines four times based on whether the line is on or off to produce a four letter answer.

The solution is **JAIL**.
